SAFETY DATA SHEET

Easy-Off Heavy Duty Oven and Grill Cleaner

1. Product and company identification

Product name	: Easy-Off Heavy Duty Oven and Grill Cleaner					
Supplier	: Reckitt Benckiser (Canada) Inc. 1680 Tech Avenue, Unit #2 Mississauga, Ontario L4W 5S9 CANADA Telephone: +1 905 283 7000					
Material uses	: Oven Cleaner					
Product use	: Consumer					
SDS #	364200PSDS v5.0_Canada					
Formulation #:	367270 v4.0					
UPC Code / Sizes	: 62200-00400 (400 gm Aerosol Can) 62200 00392 (600gm Aerosol Can)					
Manufacturer	: Reckitt Benckiser LLC. Morris Corporate Center IV 399 Interpace Parkway (P.O. Box 225) Parsippany, New Jersey 07054-0225 +1 973 404 2600					
Validation date	: 09/06/2015.					
Emergency telephone numbe	er: 1-800-338-6167					
Transport Emergency phone:	: 1-800-424-9300 (U.S. & Canada) CHEMTREC Outside U.S. and Canada (North America), call Chemtrec:703-527-3887					

2. Hazards identification

(364200PSDS)_Canada

Emergency overview

Emergency overview	
Physical state	: Liquid. [Liquefied compressed gas.]
Color	: Tan.
Odor	: Lemon-like.
Signal word	: DANGER
Hazard statements	: CORROSIVE CONTENTS UNDER PRESSURE
	CONTAINER MAY EXPLODE IF HEATED CAUSES BURNS DANGEROUS FUMES FORM WHEN MIXED WITH OTHER PRODUCTS
Precautionary measures	: Do not puncture. Do not burn. Do not swallow. Do not get in eyes. Do not get on skin or clothing. Do not breathe fumes.
OSHA/HCS status	 This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Potential acute health effect	<u>ts</u>
Inhalation	: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Ingestion	: Harmful if swallowed.
Code # : FF367270	SDS # : 364200PSDS v5. Date of issue : 09/06/2015. 1/12

0_Canada

2. Hazards identification							
Skin	: Severely irritating to the skin.						
Eyes	: Severely irritating to eyes. Risk of serious damage to eyes.						
Potential chronic health et	ffects						
Chronic effects	: Contains material that may cause target organ damage, based on animal data.						
Target organs	Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, liver, heart, gastrointestinal tract, upper respiratory tract, skin central nervous system (CNS), eye, lens or cornea, testes.						
Over-exposure signs/sym	<u>ptoms</u>						
Inhalation	: Adverse symptoms may include the following: respiratory tract irritation coughing						
Skin	: Adverse symptoms may include the following: irritation redness						
Eyes	: Adverse symptoms may include the following: pain or irritation watering redness						
Medical conditions aggravated by over- exposure	: Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.						

See toxicological information (Section 11)

3. Composition/information on ingredients

Name	CAS number	%
Sodium hydroxide n-butane (2-(2-butoxyethoxy)ethanol) Diethylene glycol monobutyl ether 2-aminoethanol	1310-73-2 106-97-8 112-34-5 141-43-5	2.5 - 5 2.5 - 5 2.5 - 5 2.5 - 5 2.5 - 5

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures

First aid	
Protection of first-aiders	;

If swallowed, call a Poison Control Centre or doctor immediately. Do not induce vomiting. If in eyes, rinse with water for 15 minutes. If on skin, rinse well with water. If on clothes, remove clothes. If breathed in, move person to fresh air.

: Use personal protective equipment as required.

Notes to physician

: Treat symptomatically.

5. Fire-fighting measures					
Flammability Remark : Not available.					
Explosibility Remark : Not available.					
Flammability of the product	In a fire or if heated, a pressure increase will occur and the container may burst. Bursting aerosol containers may be propelled from a fire at high speed.				
Extinguishing media					
Suitable	Use an extinguishing agent suitable for the surrounding fire.				
Not suitable	None known.				
Special hazards arising from the substance or	<u>r mixture</u>				
Special exposure hazards	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.				
Hazardous thermal decomposition products	Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides metal oxide/oxides				
Fire or projection hazard.	Aerosol cans may explode with extreme heat and become projectiles.				
Advice for firefighters					
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.				
Special remarks on explosion hazards					
Sensitivity to mechanical impact	Not available.				
Sensitivity to static discharge	Not available.				

6. Accidental release measures

Personal precautions	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. In the case of aerosols being ruptured, care should be taken due to the rapid escape of the pressurized contents and propellant. If a large number of containers are ruptured, treat as a bulk material spillage according to the instructions in the clean-up section. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up		
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

364200PSDS	v5.0_	Canada

6. Accidental release measures

La	rge	spill	
	•		

: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

7. Handling and storage

Handling

: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Empty containers retain product residue and can be hazardous.

Storage

Do not puncture or incinerate CONTENTS UNDER PRESSURE Do not store above the following temperature: 50°C (122°F). Store in accordance with

away from incompatible materials (see Section 10) and food and drink. Use appropriate containment to avoid environmental contamination.

CONTAINERS SHOULD BE KEPT OUT OF REACH OF CHILDREN. Pressurised container. Protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn after use. Keep away from all sources of ignition. Fires involving flammable aerosols are severe and can spread very quickly. Warehouses and stores containing aerosols should therefore be separated from other areas by a fire resistant construction of at least one half hour duration. Stores should be well ventilated, particularily at low levels. The natural ventilation in a large open warehouse building will normally be suitable. Avoid the storage of aerosols in basesments where practicable.

10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Conditions to avoid	: No specific data.
	Keep away from extreme heat. Protect from moisture. Keep from freezing.
	Do not store above 50°C
Incompatible materials	: No specific data.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

10. Stability and reactivity

Possibility of hazardous : Under normal conditions of storage and use, hazardous reactions will not occur. reactions

12. Ecological information

Toxicity of the products of : Not available.

biodegradation

Other adverse effects

: No known significant effects or critical hazards.

Release of large quantities into water may cause a pH-change resulting in danger for aquatic life.

13. Disposal considerations

Waste disposal
 The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

14. Transport information

For long distance transport of bulk material or shrunk pallet take into consideration sections 7 and 10.
